# Permafinish<sup>®</sup> Doors

## *Revolutionizing FRP Doors through “Innovations!”*

All Permafinish<sup>®</sup> Doors are totally maintenance free because they have a permanent finish which does not require any maintenance. Permafinish<sup>®</sup> Doors are completely waterproof and totally immune to termites & borers.

Permafinish<sup>®</sup> Doors have a basic internal construction of wood skeleton and in-situ Polyurethane foam encased inside a box construction of FRP (GRP) sheets with lap joints on all edges. The in-situ Polyurethane foam acts as both filler & adhesive imparting tremendous dimensional stability across the section of the Door. Permafinish<sup>®</sup> Doors are close-edged and hence made to exact size as per specifications.

Permafinish<sup>®</sup> Doors are available in two finishes : Gelcoat & Veneer finish.

The Gelcoat finish gives you a permanent single color finish, which is imparted using specially formulated resins & UV Stabilized pigments.

The Veneer finish achieved using Printed FRP Tissue replicates the majestic look of Polished Wood Veneer, which looks exceedingly genuine and requires no maintenance. This engineered product, which replicates not only the look but also the feel of a timber door with a unique Wooden Texture, gives you excellent value for money.

Doors

## *Range of Exclusive FRP Doors*

This exclusive series of FRP Shutters is breathtakingly beautiful and makes a distinctive statement about your Abode. **These Veneer finish doors offer you the Grandeur and strength of timber together with the durability of FRP.**

Many of these doors have open panels for fixing designer glass (not provided), which are then bordered with specially cast beading.

**Entranza<sup>TM</sup>** doors are created with great attention to detail, right from its one-piece high grade FRP Mold to its detailed profile. Entranza<sup>TM</sup> doors also offer Two Tone finish combining two different printed FRP Tissues for a look that is truly entrancing.
